

Cover Letter

Dear Hiring Manager,

I am excited to apply for the Full Stack Developer position. My passion for building reliable, scalable software has driven me to become a self-taught Full Stack Developer with hands-on experience delivering production-ready web and mobile applications from concept to deployment.

Over the years, I have independently built complete software solutions using React, Next.js, React Native, Node.js, Express, Python (Flask), PostgreSQL, MongoDB, and MySQL. My experience spans the full software development lifecycle, including system design, REST API development, database architecture, deployment, and ongoing maintenance.

One of my proudest accomplishments is developing the Interpark Property Management System and its companion mobile application, which are actively used in production. I have also developed an e-commerce platform, an AI-powered healthcare chatbot, and an event ticketing platform, giving me practical experience building secure, user-focused applications that solve real business challenges.

I am particularly drawn to this opportunity because it aligns with my passion for creating impactful digital solutions. I enjoy learning new technologies, collaborating with teams, and continuously improving my skills to deliver high-quality software. Although my academic background is in Theatre and Film Technology, my professional journey has been shaped by continuous learning, discipline, and a genuine love for software development.

I would welcome the opportunity to discuss how my technical skills, practical experience, and enthusiasm can contribute to your organization. Thank you for your time and consideration. I look forward to hearing from you.

Yours sincerely,

Kelvin Wachira
